

EZ BALANCER

CONGRATULATIONS ON YOUR PURCHASE OF THE HD EXTENDED CROSS BRACES FOR THE EZ BALANCER II

- *All aluminum 3/16" thick!*
- *Powder coated to match the EZ Balancer II*
- *At 32" wide, these new cross braces will accommodate 1/5th to 1/3rd scale models with ease!*
- *They cover from the stock width of 18" out to 32"!*
- *100% Made in America!*

Instructions:

1) Remove the original braces from your EZ Balancer II unit. There should be 4 bolts, nuts, wing nuts and washers that hold the original stock braces to the uprights.

2) Unpack the new HD Extended Cross Braces from the shipping box and reinstall the 4 bolts, washers and nuts into the original 4 holes that held the stock cross braces.

3) You have the choice of widths ranging from 18" through 32"!

4) If your landing gear touch the rib of the brace, try turning that brace around for clearance.

If that does not work, we offer a set of Super Size extenders that will give 4 ½" of additional clearance.

Any questions, contact us at: contact@ezbalancer.com

Thank you!
